DETAILED ACTION

Allowable Subject Matter

1. Claims 1-27 allowed.
2. The following is an examiner's statement of reasons for allowance:

There is reference in prior art teaches of a portable computer with alarm system for providing an alarm indication or disabling of the computer system upon unauthorized movement of the computer from a stationary position using motion/tilt switch or sensor as found in French (US 5760690). However, there is no prior art teaches of present invention claiming an apparatus and method for preventing the loss of a portable communication device comprising the steps of: monitoring an acceleration profile of the device at the device using an accelerometer or acceleration sensor; and entering a secure mode which limits access to the portable communication device upon determining the acceleration profile matches a predetermined acceleration profile; the acceleration profile includes one indicating the portable communication device has been dropped and picked up.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
